

QUTHING DISTRICT COUNCIL

Information Handbook

June 2008

PREPARED BY
DEPARTMENT OF PLANNING, MINISTRY OF LOCAL GOVERNMENT AND
CHIEFTAINSHIP

SUPPORTED BY
GTZ LESOTHO

The Ministry of Local Government and Chieftainship (MoLGC), through its Department of Planning, remains the owner of this handbook. However, there shall be no copyright restrictions over the use or replication of the whole or parts of this handbook. This is an approach for utilization by the interested parties and is entirely in Public Domain. However, no changes shall be made to the handbook and reprinted thus without the permission of MoLGC, Lesotho.

Version Dated: June 2008

Cover picture: The mountain in the background shows the natural landscape in Quthing which is largely a mountain area. The centre of the picture shows Basotho women, clad in their uniform blankets; this traditional attire is worn for special occasions and celebrations. The smaller group of Bathepu women also in traditional attire, a small but significant ethnic group found in Quthing. The foreground shows the Quthing aloe famous for its medicinal use.

Acronyms

AIDS – Acquired Immuno Deficiency Syndrome

B&B – Bed and Breakfast

CC – Community Council

DC – District Council

DCS – District Council Secretary

ED – Electoral Division = Local Government Constituency

GTZ – German Development Cooperation

HIV – Human Immuno-deficiency Virus

IEC – Independent Electoral Commission

Km – Kilometre

MOLGC – Ministry of Local Government and Chieftainship

NGO – Non Governmental Organisation

STD – Sexually Transmitted Diseases

TB – Tuberculosis

VCT – Voluntary Counselling and Testing

WASA – Water and Sewage Authority

Introduction

The Local Government District Information Handbook for Quthing provides essential data on the socio-economic aspects of the district, disaggregated council wise. The broad objective of this database is to assist Local Government, Government Ministries, NGOs, community groups, individuals and others to understand the socio-economic status and profile of each of the community councils so that they can partner better with the Local Government. This information is provided to facilitate informed decision making at district and community council level while at the same time informing the national local government database, at a subsequent stage. We hope that this Handbook will become a reference information book for all information pertaining to local government in this district.

The information is presented in the form of tables providing statistical and descriptive information of the councils. These include data on the general profile of the Councils, social indicators, gender issues, and information about selected sectors, namely, agriculture, trade, health, HIV & AIDS, education, water, roads, communication, energy, environment etc.

Background to Local Government in Lesotho

The local government elections, held for the first time in Lesotho in 2005, led to the establishment of 128 Community Councils, 10 District Councils and the Maseru Municipal Council with about 1508 councillors. Each Council has indirectly elected Chairpersons and Vice Chairpersons as well as a number of Standing Committees for specific purposes. The process of Administrative deconcentration and integration at the District level is coordinated by the District Administrator who represents the interests of Central Government in the district. The process of political and service decentralisation is being managed on a day to day level by the District Council Secretary. Each District and Community Council has a Local Government Service staff compliment to assist in the operations of the councils. A number of staff from about nine line ministries, who perform functions that have been decentralised to local government, is assigned to work under a designated council.

Methodology

The process of development of this Handbook has been coordinated and supervised by Department of Planning, Ministry of Local Government and Chieftainship (MOLGC). The information presented in this handbook was collected by the following people who volunteered their services in The Ministry of Local Government; Fooso Kesi, Hopolang Lent'sa, Limpho Hlatsi, Masefabatho Sula and Tanki Tuoane. Community Councils (CCs) were supervising data collection in their respective areas. The compilation of this handbook as well as the technical design of the process was supported by German Technical Cooperation (GTZ). This information was collected using a CC Fact Sheet (Annex 1) whose respondents were the councillors and other council support staff. A detailed or intensive House Hold survey was not engaged. This is a first attempt at collating key information trends aggregated as per CC boundaries. This information will be revised through updating, and subsequently validated against other secondary data sources, especially from the concerned sectors at the district level.

1. Profile of the Council

| CC-names and codes | Population | % of district population | Males | Females | Total no. of deaths in the last year | Total no. of deaths as % of population | Total no. of births in the last year | Community Council area in km ² | No. of EDs | No. of villages | Average Population per Village |
